

# VCF Finisher

## Operator working instructions

### Azura Vi machine Finisher.

VCF Finisher is a storage gum which is compatible with the Azura Violet gum on a VCF clean-out unit or modified "classic" polymer processor. Finisher protects the surface of printing plate as a standard storage gum (1-2 weeks). The finisher neutralises the Azura Violet gum in order to protect the images. VCF Finisher is a low viscosity finisher which allows to apply a thin gum layer.
